

## DevOps Engineer — Job Description

**Position:** DevOps Engineer

**Location:** Hyderabad / Remote

**Employment Type:** Full-Time / Internship

### Position Overview

We are looking for a skilled **DevOps Engineer** to streamline development and deployment processes by automating infrastructure, improving system reliability, and ensuring continuous integration and delivery. The role focuses on collaboration between development and operations teams to deliver scalable and secure applications.

### Key Responsibilities

- Design, implement, and maintain CI/CD pipelines
- Manage cloud infrastructure and server environments
- Automate deployment, monitoring, and scaling processes
- Configure and maintain Linux-based systems
- Implement Infrastructure as Code (IaC) practices
- Monitor system performance, availability, and security
- Troubleshoot build, deployment, and production issues
- Collaborate with development teams for smooth releases
- Maintain system documentation and operational reports

### Qualifications & Skills

- Strong understanding of DevOps principles and workflows
- Knowledge of Linux, networking, and system administration
- Hands-on experience with tools such as Docker, Kubernetes, Jenkins, Git
- Familiarity with cloud platforms (AWS / Azure / GCP)
- Scripting knowledge (Shell / Bash / Python)
- Understanding of CI/CD, automation, and monitoring tools
- Strong problem-solving skills and attention to detail

### What We Offer

- Exposure to real-world DevOps and cloud environments
- Advanced training and certification support
- Clear career progression in DevOps and Cloud Engineering
- Hands-on experience with live deployment projects
